PROFESSIONAL SUMMARY

MERN Stack Developer with practical, hands-on experience building real-world web and software applications across a wide range of business domains, including e-commerce, ERP, CRM, HRMS, inventory and warehouse management, billing, OTT/content platforms, rental platforms, and organization/business management systems. Skilled in developing responsive front-end interfaces with React.js, building REST APIs and backend services with Node.js and Express.js, and integrating MongoDB-based, database-driven applications. Experienced in developing admin dashboards, role-based access systems, and business workflow features across multiple client and organizational projects. Comfortable working across the full application development lifecycle using Git/GitHub-based collaborative practices.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, NestJS, REST APIs

Database: MongoDB, Mongoose

Mobile Development: Flutter

Tools & Version Control: Git, GitHub

Development Areas: Full Stack Web Development, Responsive Web Development, API Integration, Authentication, Role-Based Access Control, SaaS Application Development, ERP Development, CRM Development, HRMS Development, E-commerce Development, Business Application Development

PROFESSIONAL EXPERIENCE

MERN Stack Developer — DigiCoder Technology Pvt. Ltd.

July 28, 2025 – Present

Lucknow, Uttar Pradesh, India

- Develop and maintain full-stack web applications and business software using the MERN stack (React.js, Node.js, Express.js, MongoDB) across multiple client and business domains.
- Build responsive, user-friendly front-end interfaces with React.js for e-commerce, ERP, CRM, HRMS, and other business applications.
- Design and integrate REST APIs to connect front-end applications with backend services and MongoDB databases.
- Implement authentication and role-based access control to support secure, multi-user business workflows.
- Develop admin dashboards and reporting features for business management, inventory, warehouse, and billing systems.
- Debug issues, implement new features, and manage development using Git/GitHub across live client and organizational projects.

FEATURED PROJECTS

Built using the MERN Stack (React.js, Node.js, Express.js, MongoDB) with REST API integration.

E-Commerce Software / Website

- Developed an e-commerce platform covering product management, a customer-facing shopping experience, and admin-side business workflows.
- Built a responsive web interface with API and database integration to support order and business management.

ERP Software

- Developed ERP software for centralized management of business/organizational operations through digital workflows.
- Implemented role-based access, administrative workflows, and dashboard/reporting functionality for business process management.

CRM Software

- Built CRM software for managing customers, clients, and related business workflows through a central dashboard.
- Implemented role-based functionality with API and database integration for data management.

HRMS Software
- Developed HRMS software for managing employee records and HR-related business workflows.
- Built an administrative dashboard with role-based access for employee data management.

Inventory Management Software
- Built inventory management software for tracking stock and product/item data.
- Developed administrative workflows and dashboard/reporting functionality for inventory data management.

Warehouse Management Software — Indian Army
- Developed warehouse management software to support inventory/stock management and operational workflows.
- Implemented administrative management, data tracking, and role-based workflows at a high level, without exposure to sensitive or restricted operational information.

Billing Software
- Developed billing/invoicing management software to support business data management.
- Built dashboard and admin functionality with a responsive interface and database integration.

ADDITIONAL PROJECTS & CLIENT WEBSITES
